

Clicker 5 Quick Start Guide

Clicker 5 can be used with many different students who might have different support needs. To ensure the program is set up for each student individually, you will need to set User Preferences and save a Crick Software Options File for each student who will be using the program. User Preferences will over ride any Clicker 5 File setting ensuring that the environment is just right for the student user. This Quick Start Guide shows you how to change the User Preferences and save (export) them.

Saving User Preferences	
1	<p>Open User Preferences under the Options menu.</p> 
2	<p>Adjust the User Preferences to suit your student under the Editing, Writing, Speech and Appearance tabs.</p> <p style="text-align: center;"><i>Then click OK</i></p> 
3	<p>Go to Options > Import and Export > Export User Options...</p> 
4	<p>Type in the student's name in the File name field. Make sure you are saving the file in the Clicker 5 folder.</p> <p style="text-align: center;"><i>Then click Save</i></p> 
5	<p>Now your student can double click on their name in ClickerExplorer to start Clicker 5 with their personal preferences.</p> <p style="text-align: center;"><i>Student file</i></p>
