

## The School Year has Galloped Out of the Gate!

It's been an amazing start to the 2017-2018 school year both at SET-BC and in districts all over the province! So many districts are experiencing staffing challenges necessitating school and district teams working together to cover sometimes significant staffing shortfalls. We have been very fortunate to have welcomed a number of new consultants to our Tier 1, Tier 2, and Tier 3 teams but, as we head into November, are still looking to fill four consultant positions. Both new and returning consultants are working very hard to ensure we meet as many district service requests as possible - we appreciate districts' flexibility in setting service dates and individual teams' patience as we ship equipment for our core and supplemental services as quickly as possible.

We hope, as you do, that the pace will slow down soon. Thanks for your continued support during these challenging times!
