

Toontastic App

Introduction

- This open-ended 3D Story-telling App that allows students and educators to draw, animate, and narrate cartoons to express a story, an idea, or an experiment.
- The templates are set up for the stages of story, or a science experiment.
- Students may collaborate with others, and select or create multiple characters within their scene to animate, and narrate.

Integration Ideas

- Book reports
- Science reports
- Historical reenactments
- Biographies
- Social Lessons
- Vocab/dialogue practice
- Create tutorials
- Explain projects
- Morning reports
- Summarize a story
- Show thinking

Task Challenge/Activity

- Start a new creation and pick a storyline
- Choose a scene such as short story
- Select one of the settings or draw your own
- Add multiple characters or draw your own
- Record your scene for one minute, while moving and narrating your characters
- Set the mood by choosing music for your scene
- Repeat for all scenes
- Name your story
- Export your finished product into your photo library. It will save as a video.
