

Websites:

FileFolder Heaven: <http://www.filefolderheaven.com/>

This site has printable file folder games, preschool activities and autism tasks offer students a hands-on way to practice basic skills. These file folder games and activities provide students many opportunities to practice a wide variety cognitive skills at their level. Special Education teachers, preschool teachers, and parents enjoy using file folder games, printable activities, adapted books and autism tasks because they are inexpensive learning tools, simple to assemble, and easy to store. Cost is dependent on the item.

Adapted Stories: <http://www.adaptedstories.com/info/about.cfm>

This is subscription-based website. The stories are symbol supported stories for children at an early literacy level. It is intended for children with communication difficulties, including nonspeaking children. The simplicity of the stories allows children to retell the stories easily with the supported symbols. There are two collections. These collections are updated continuously so new content will be available.

Speaking of Speech: <http://www.speakingofspeech.com/>

This is an interactive forum for speech/language pathologists and teachers to improve communication skills in schools by:

- exchanging ideas, techniques, materials, and lessons that work,
- finding out about materials before you buy,
- seeking and giving advice on therapy and caseload management issues, and
- exploring a myriad of helpful resource links

Hearing Journey: <http://www.hearingjourney.com/>

The Listening Room® link on this website provides you with a foundation of interactive and uniquely designed practice activities to maximize hearing experiences so that communicating with others is both successful and enjoyable. Register for free to access the extensive™ resources.

HandsOnReading: <http://www.mayer-johnson.ca/nsearch/?keywords=hands-on+reading>

These are commercially available books with extension activities.
