Visor for the Chrome web browser is a reading support extension that acts as a screen dimmer, which aids in reducing eye-strain, resulting in better concentration and comprehension while reading.

**Integration Ideas –**

- Simplify studying for an exam or research.
- Read an article and highlight/focus on certain paragraphs.
- Highlight certain sentences that are important, for note taking purposes.

**Task Challenge/Activity**

- Add Visor through Chrome Web Store. This will install the Visor extension.
- The extension icon will appear next to the URL bar in the upper right hand corner of Google Chrome web browser.
- Go to Vancouver Sun - [http://vancouversun.com/](http://vancouversun.com/).
- Click a news article.
- Click the Visor icon next to the URL bar.
- Try changing colour, size and opacity of the visor. Can you figure out how?

**Tip...** This extension will not work on Chrome’s start page, options pages, or the chrome web store.
How can I learn how to use it?
