

# Explain Everything

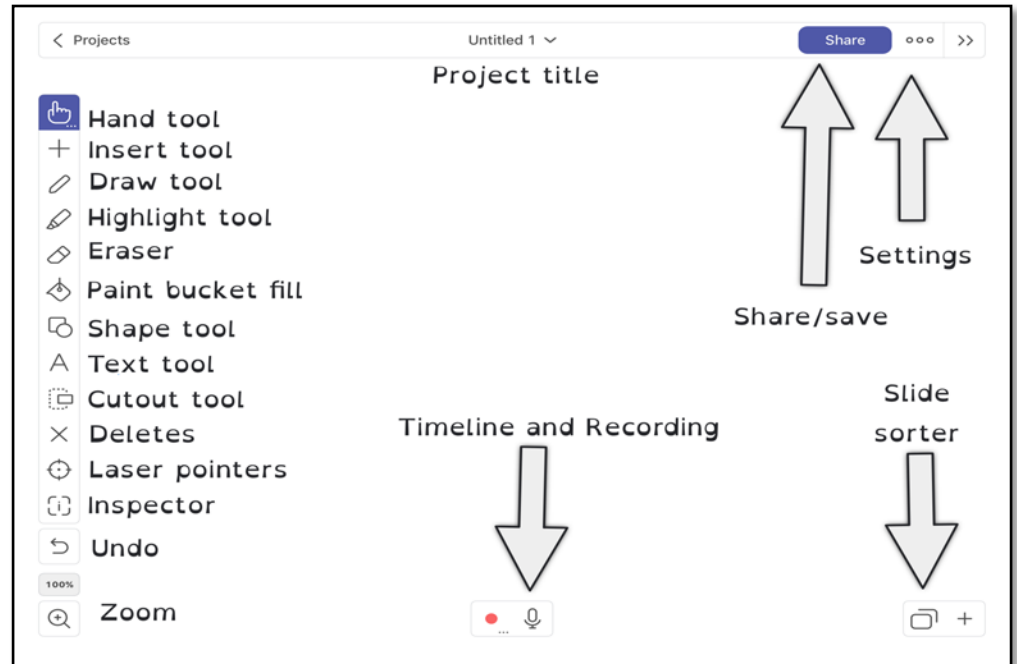

## Introduction

Explain Everything Whiteboard is an interactive screencasting app. It offers many tools and templates for creating animated slide shows and videos. You can record voice, video, and even create your own animations.

Tutorials:

## Task Challenge/Activity

1. Open the **Camera** app and take a group selfie.
2. Open **Safari** and find four photos of your favourites – (places, food, animals, sports). Can you figure out how to save the online photos to the iPad?
3. Open **Explain Everything** app and select a colour template by tapping on the + sign.
4. Create five slides. Tap on the + sign at the bottom right hand side to add a new slide. Can you figure out how to go back to the first slide?
5. On the first slide, tap on the + sign in the tool bar on the left side to add the selfie of you. Now add the four photos you just saved to the other slides (one photo per slide).
6. Starting at the first slide, tap record and record your voice describing each slide. Pause recording after each slide OR tap the > in the slide sorter tool (bottom right hand corner) to advance to the next slide while you are recording. Tap on the pause button when done recording. Can you figure out how to edit, overwrite and mix your recording?
7. Tap on the Export button (top right corner) to export your project as a video, PDF, image, or Explain Everything file (or save in Explain Everything).

**Bonus:** Try making animations, using the rotation tool, using the lasso tool when importing photos Get Creative!
