

## Making your NOVA Chat a Dedicated Communication Device

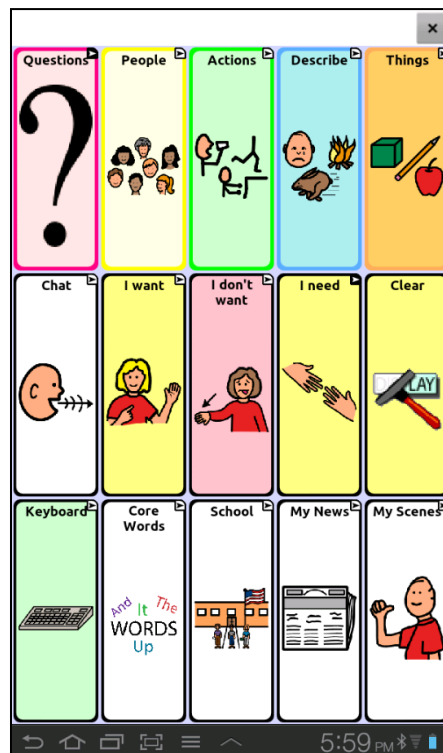

SET-BC provides teams with loans of the NOVA Chat communication device for students requiring communication support. This communication device is an Android-based tablet that comes with the NOVA Chat app installed. As it is an Android-based tablet, it also comes with additional apps installed.

SET-BC is only able to provide support for the use of the NOVA Chat as a communication device and when used with the NOVA Chat software. SET-BC is not able to provide support for the Android operating system, for other installed or downloaded apps, or for other uses of the device such as web browsing, email, or other Internet access. Teams will need to contact their own technical support departments if they need help or support with the Android operating system, any apps other than the NOVA Chat software, and any uses of the device other than as a communication device using the NOVA Chat software.

If the device is sent in to SET-BC's technical support team as a result of a NOVA Chat problem, the likely support will result in the device being "wiped clean" and the NOVA Chat being reinstalled. Teams are strongly encouraged to follow the instructions below to lock the device thus minimizing the issues that the Android platform may cause, and maximizing the ability of their students in using the intended NOVA Chat app for communication.

You must:

- Lock access to Android features (page 2)
- Lock access to the NOVA Chat menus (page 5)

# Locking Access to Android Features

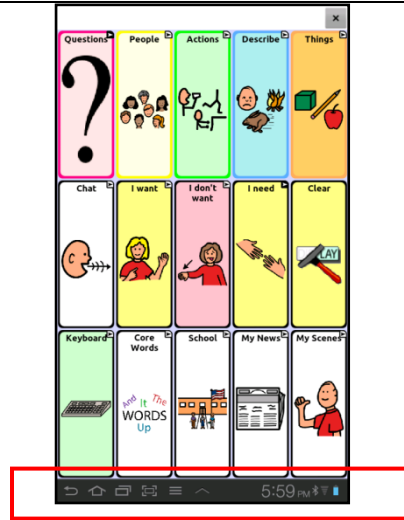

1

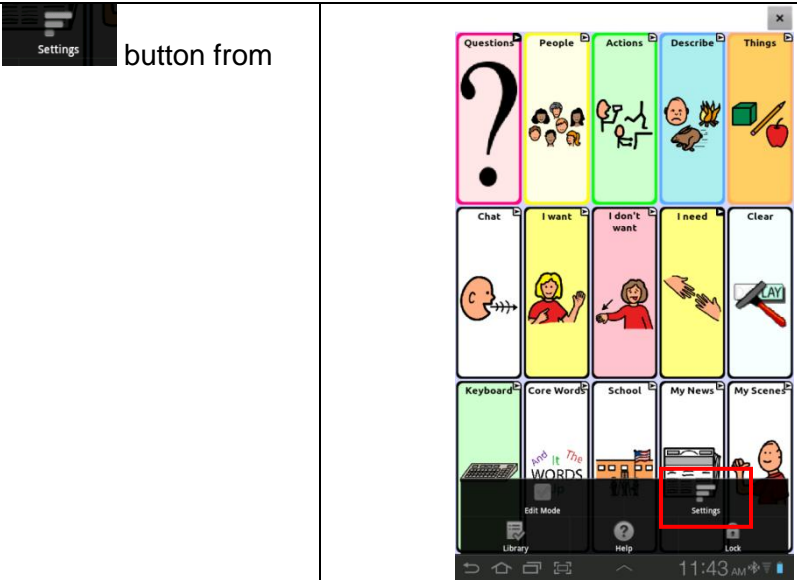

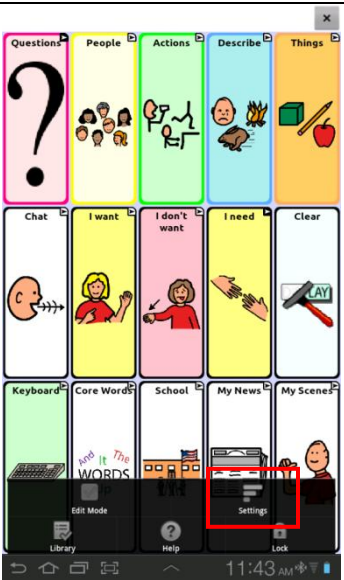

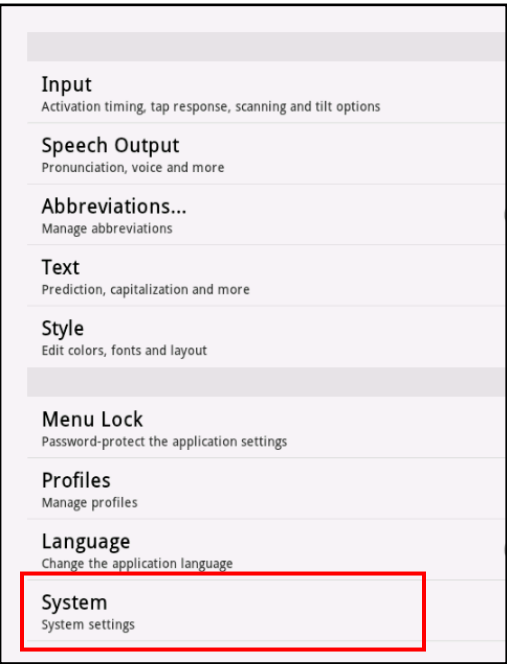

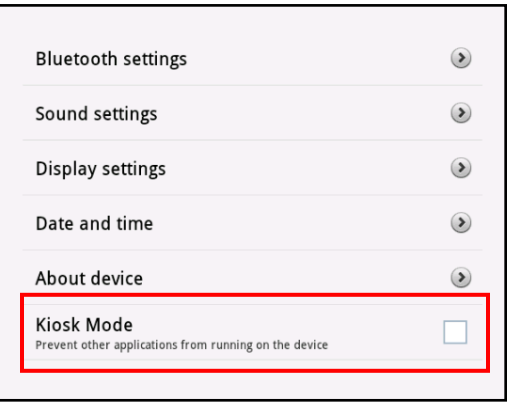

From the home screen, press the **NOVA Chat** icon to launch the program.

2

Press the **Menu** button  from the bottom taskbar.

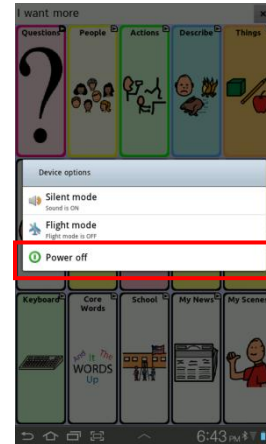

<p>3</p>	<p>Press the <b>Settings</b> button from the pop-up menu.</p> 	
<p>4</p>	<p>Select <b>System</b> from the list.</p>	
<p>5</p>	<p>Tap the <b>checkbox</b> to turn on the Kiosk Mode.</p> <p>This will lock the user in the NOVA Chat application, not allowing them to exit into Android.</p>	

**Restart** the device to activate the changes.

(Press and hold the **Power** button until the Device Options menu appears. Then press **Power off**.)

6

To turn on the device, press and release the **Power** button)

# Locking Access to NOVA Chat Menus

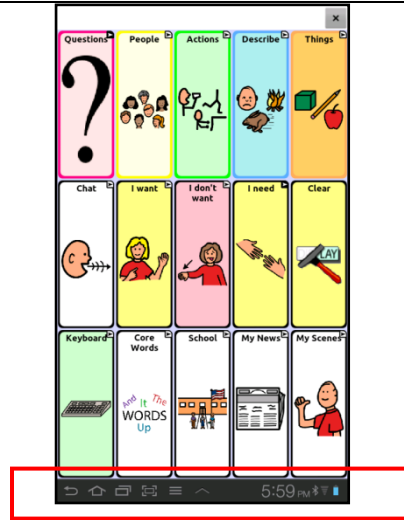

1
