

SUSTAINABLE DEVELOPMENT GOALS

The Sustainable Development Goals are a way to protect our planet.

All people can help to protect our environment.

We can learn to make choices that are good for people and for the planet.

SUSTAINABLE DEVELOPMENT GOALS

These are the 17 goals we will learn about.

It is important to share what we have.

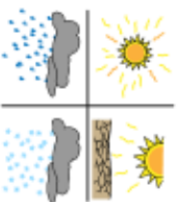

Poverty is not just about money.

Let's think of ways to help people in the community who are experiencing poverty.

How can we avoid wasting food?

Climate change can impact the ability for people to grow their own food.

We can help by sharing food with people who are very hungry.

3 GOOD HEALTH AND WELL-BEING

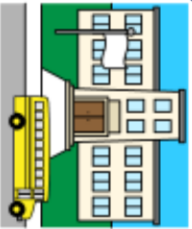

How do we learn about healthy living?

It is okay to talk about mental health and to ask for help.

We can look after each other and say kind things to friends, family, and people in the community.

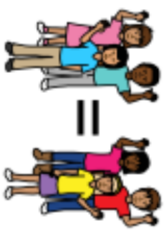

The school is an important part of our community.

We can also learn at home, in libraries or museums, or by experiencing nature outside.

Education gives us the opportunity to have a better future.

We all have a responsibility to treat people with kindness, equality, and fairness.

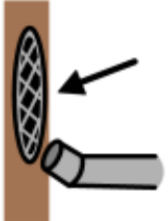

Girls and boys can all contribute to our communities and act as role models for young people.

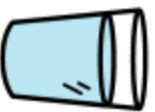

The world is a better place when girls are allowed to go to school, just like the boys.

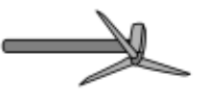

Water is necessary for all living things.

Drains lead to rivers, lakes, and oceans.

A clean water system gives us clean water to drink.

Windmills provide us with clean, renewable energy.

Could our school or community use power from solar energy?

We can save energy by switching off lights and electronics when they are not in use.

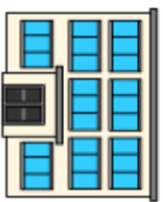

What are the career opportunities in our community?

How do youth contribute to the economy?

A career counsellor can help you identify career and education opportunities that fit your interests.

There are many forms of industry in our community.

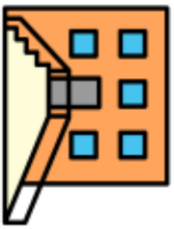

Innovators create solutions to complex problems and help make a better world.

Infrastructure projects help people move and access services more easily.

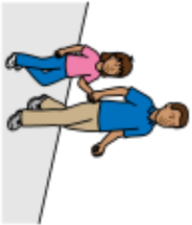

It is important that everyone gets their fair share.

What examples of equal access exist in our school?

How do we make sure that everyone has access to food, employment, education, and shelter?

Where we can walk to in our community?

Using public transit is good for our environment.

Recycling is an important part of sustainability in our community.

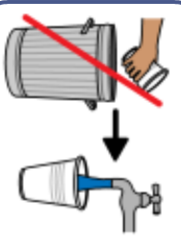

**12 RESPONSIBLE
CONSUMPTION
AND PRODUCTION**

Take only what we need.

Produce less garbage.

Choose reusable products.

Everyone is responsible to protect the planet.

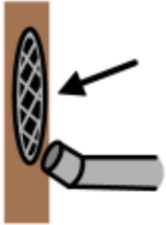

Clean air is important for healthy living and slowing climate change.

Our future depends on taking action now.

What plants and animals live in our oceans, rivers, and lakes?

Where does water go after it goes down the drain?

How can we learn more about life under water?

Forests and wilderness provide a habitat for many different animals.

Only some animals can survive in the desert.

What animals live in mountain regions?

How can we promote peace in our school and community?

What is justice?

Community institutions and programs make our daily life better.

Let's work together to achieve the Sustainable Development Goals.

Who can we ask to help us with the Goals?

Everyone can be a partner to support the Goals!
